EXECUTIVE SUMMARY

- **3 Years** work experience in AI Engineering/Software development space
- **Self-driven** individual enthusiastic to learn tech industry applications currently through competing in over **30 hackathons** and events.

Experience

- **RAiD (RSAF Agile innovation Digital)** Jan 2025 - July 2026
 - **AI Engineer**
 - Real-time speech diarization & transcription application for ATC controllers
 - Augmenting sim-pilots' console based operations using digital twin+agentic solutions
- **Tensorplex Labs (Crypto AI Startup)** April 2024 - Aug 2024
 - **AI Engineer**
 - LLM-Powered community management and helpdesk chatbot that will automatically answer questions, manage and moderate discussions and handle tickets for Web3 Projects. Serving over 10000 members across 4 crypto projects' discord servers
- **A*STAR - Agency for Science, Technology and Research (ARTC)** Jan 2024 - April 2024
 - **AI Engineer**
 - Led AI-driven supply chain risk management research in partnership with Fortune 50 medical company, developing an early warning system leveraging LLMs
- **A*STAR - Agency for Science, Technology and Research (ARTC)** March 2023 - Jan 2024
 - **Development Scientist Intern**
 - Question Answer LLM Agent insights on what-if situation for Hydrogen Supply Chain optimization
 - Custom Knowledge-based LLM Retrieval, with Analytical visualizations

Volunteering Org (Founding)

- **Singapore Youth AI - Head of Community** Dec 2024 - Current
 - Heading the planning and execution of monthly AI meetups islandwide, featuring networking sessions, hands-on AI workshops, and fireside chats with industry leaders.
 - Successfully organised 10 events to date, each engaging 30–60 youths from polytechnics, universities, and junior colleges. sgyouthai.org/programs#AIMM

Activities (Hackathons) 35+ Total

- **HackOmania 2026**

March 2026

- 24h Hackathon, 320+ Participants.

Achievement: 1st place. \$1000 + \$2100 AI Credits

- **NUS HACK&ROLL 2025**

Jan 2025

- A creative twist on the classic Skribble-io - we built a game where players win by sketching drawings that humans can recognize but AI can't decipher. [Find out more](#)

Achievement: Best Pre-University Hack

- **NUS HACK&ROLL 2024**

Jan 2024

- 24 hours to build what you want. No problem statements, no theme.
 - ABCD - A Brilliant Cobra Duel" - a modern twist to the classic snake game, infused with a touch of LLM Spice. Engage in 1v1 battles with your developer friends to determine the ultimate professional proompt engineer. <https://devpost.com/software/a-brilliant-cobra-duel>

Achievement: Best Pre-University Hack

- **POLYFINTECH 100 API HACKATHON 2023**

July 2023

- Develop FinTech prototypes to address real-world problem statements. [Find out more](#)

Achievement: Champion team \$2500

Extracurricular Activities/Leadership

- **SP Guitarist Vice-President**

March 2022 - Present

- Leads a team of 6 to plan and execute events for the CCA: SP Guitarist with around 40 members
Responsibilities include but not limited to:
 - • Recruitment of new members • Organizing concert performance • Run weekly training sessions • Communicating between instructor and club officer • Improve

- **SPAI student chapter committee member**

Feb 2022 - Present

- Plan numerous AI-themed workshops and competitions to provide our members with the opportunity to expose themselves to AI-related content.

Education

- **Diploma in Applied Artificial Intelligence and Analytics**

April 2021-March 2024

Singapore Polytechnic • Singapore

- CGPA: 3.86

- Achieved Distinction for LC0855 Communicating for Project effectiveness and LC0861 Narrative Thinking.

- **Singapore-Cambridge GCE O Levels**

Evergreen Secondary School • Singapore

Jan 2017- Nov 2020

Grade:

Net LIR4 score: 5 • LIR5: 7

- Achieved A1 in Elementary Mathematics, Biology , Chemistry/Physics, Combined Humanities
